

As a one-time member of the Soil Science Department Faculty, as a colleague, and also Brother-in-law of our renowned and esteemed Soil Scientist, Marion Jackson, I am happy for the opportunity to contribute to the fund in his memory. Marion Jackson and Emil Truog were giants among Soil Scientists. We are all proud of our association with both of them. They were accomplished in separate fields, yet their thinking and especially their leadership of graduate students were similar. We admire, respect, and revere the two of them!
